The NEW AVLA LICENCING PROGRAM

New price: \$110.25

INFORMATION PAGE ONLY

for the new **STANDARD ALL-IN-ONE AVLA LICENCES**

The cost of the new special licences which permit DJs to make copies of sound recordings onto **BOTH** Hard Drives, CDRs and other formats, with no limit on the number of sound recordings on the any type of format has increased to \$110.25. The new Standard AVLA Licence covers one library of your choice of format. As before, the hard drive licence permits an unlimited number of sound recordings. CDRs (and other blank media formats) also have unlimited number of songs applicable to this same licence.

NEW! For the first time, these licences allow for one back-up copy of the system to be made. There is no additional fee for this privilege. The Back-up is a single computer memory drive, which MAY NOT be publicly performed.

Every Member DJ Company will reveal the number of (COPIED) Library Systems that are used by the member company on a full booking date. Music Services Subscription Services are not included in this count as the Music Supply Service company has already paid the AVLA licence fee. Original Store-bought CDs are also exempt because they are not copies of sound recordings.

It does not matter to which type of blank media you copy the music. Each copied library collection will require a \$110.25 licence with one, non-publicly performed, backup permitted per licence. A second (operational) DJ library of any format would require the second licence (and so on).

Example:

Number of Licences your company will need for the number of (copied) libraries used for your business purposes times \$110.25

Number

X \$110.25 =

** Please fill in the Signature Page that is on the next page. Print this form and send it as your valid acceptance of the CDJA & AVLA Contract details that you agreed to in your formal online application sheets.*

***Licences will not be issued unless we receive the Signature Page. We need your paperwork to secure your licences and process your CDJA registration.*
